## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show "28" airflow as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "header" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Art Unit: 3726

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1- 15 are rejected under 35 U.S.C. 102(b) as being anticipated by

Hagenmeister(U.S. Patent 4,815,535).

Hagenmeister discloses a method of at least one of increasing airflow around a plurality of tubes in a heat exchanger, and increasing a web in

Art Unit: 3726

a header around such plurality of tubes, the method comprising the steps of:

a) providing a predetermined plurality tubes (8) having a predetermined end configuration; b) providing a header having a predetermined number of openings, in a predetermined staggered array, corresponding to the predetermined plurality of tubes, disposed in the heat exchanger; and c) securing an end of each predetermined plurality of tubes into the predetermined number of openings in the header ; and wherein configuring of the predetermined number of openings is created substantially identical to the predetermined end configurations the predetermined plurality of tubes (Figs 1 and 2; col. 2, lines 23-28)

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hagenmeier (U.S. Patent 4,815,535).

Hagenmeier fails to teach the steps of creating fluid seal and fluid seal is accomplished by at least one mechanical (rolling and machining) and non-mechanical bond (at least one of welding, brazing and adhesive).

Official Note is taken that creating fluid seal and fluid seal is accomplished by at least one mechanical (rolling and machining) and non-mechanical bond (at least one of welding, brazing and adhesive) is well known in the art and it would have been obvious to one

Art Unit: 3726

of ordinary skill in the art at the time of the invention was made to employ the above steps on the Hagenmeirs process for achieving fluid seals .
